DESCRIPTION: Intensive In-Community Service (IIC) is a critical, focused goal oriented, and needs based clinical intervention that focuses emotional and behavioral challenges of youth with medium to extreme requirements. It may be provided in a youth's home or in an agreeable community location OR virtual/hybrid by a licensed behavioral health clinician and is proposed to alleviate and support the youth and family to deter more intensive interventions and to support the youth and family in partnership with the Child Family Team (CFT) or identified support system. This is a short-term, resolution focused intervention that addresses exhibiting behaviors resulting in the youth and her/his family/care giver/guardian increasing understanding and enhancing function at home and in the

community. Youth and families are qualified to receive Intensive In-Community Services if they are receiving Care Management, MRSS services, and as part of the Transitional Planning process from OOH treatment back to the community, through the NJ Children's System of Care or transitioned to CMO, Case Management Organization.

All IIC can create their own schedule according to the caregiver, this is a in home or in community intervention and clinical services which will comprise of creating interventions, treatment, and goals support. There is exception to face to face when any members of the family are ill the Behavior Assistant must make all efforts to meet the youth via zoom if the child is respondent.

This is a short-term, resolution focused intervention that addresses exhibiting behaviors resulting in the youth and her/his family/care giver/guardian increasing understanding and enhancing function at home and in the community. Youth and families are qualified to receive Intensive In-Community Services if they are receiving Care Management, MRSS services, and as part of the Transitional Planning process from OOH treatment back to the community, through the NJ Children's System of Care or transitioned to CMO, Case Management Organization.

Mobile Response Stabilization Services (MRSS) interventions provide youth and their parent/guardian/caregivers with short-term, flexible service coordination to assist in supporting youth who are vulnerable to or experiencing stressors, coping challenges, emotional or behavioral symptoms. These include difficulties with substance use as a coping strategy, or traumatic circumstances, which may compromise the youth's ability to function optimally. Interventions are designed to support the youth to remain in, or return to, his/her present living arrangement, to function within peer relationships, in school and community settings, and to maintain the least restrictive treatment setting. Youth may have co-occurring treatment needs related to intellectual, developmental disability, substance use, and behavioral health. Mobile Response and Stabilization Services: Stabilization Management – Up to 8 Weeks –with extensions when needed

Care Management Organizations (CMO) are independent, community-based organizations that combine advocacy, individualized service planning and care management into a single, integrated, cross-system process. Care Management services provide a single point of accountability to ensure services are accessed, coordinated, and delivered in a strength based, individualized, youth focused, family driven, ethnically, culturally, and linguistically relevant manner. The CMO assesses, designs, implements, and manages youth guided and family driven, Individual Service Plans (ISP) for children and adolescents whose needs are complex and require intensive care management techniques that may cross multiple service systems. Up to 12 weeks-with extensions when needed
